

## ABSTRACT OF THE DISCLOSURE

The present invention comprises a system and method for using a personal digital assistant to browse and select program listings. The method of the present invention involves browsing one or more program listings to select a given program listing. The program listings are presented on the personal digital assistant through the use of a local electronic program guide. Where a program corresponding to the given program listing is not being aired when selected, the given program is marked for a reminder in the local electronic program guide. The reminder in the local electronic program guide is synchronized with a remote electronic program guide running on a remote device.
